

D-SOLVE and DZIF Translational Seminar Series 2024

## The ABC of Viral Hepatitis

from translational research to clinical practice

- a joint event of the D-SOLVE and DZIF Academy -

November to  
December 2024

### Organizers

Prof. Dr. Heiner Wedemeyer  
Dr. Carola Kaienburg  
Dr. Jennifer Debarry

Department of Gastroenterology, Hepatology, Infectious Diseases and Endocrinology, Medical School Hannover  
and Center for Individualized Infection Medicine, Medical School Hannover

# Programme

Intensive exchange between research and clinic is essential for successful translation. With the translational seminar series on the topic of hepatitis we would like to take a closer look at the various steps that make up successful translation: the latest findings from research, current clinical studies, practical experience from the clinic as well as future-oriented developments in therapy. The series of seminars aims to facilitate and intensify the exchange between researchers and clinicians, and thus to strengthen cooperation in the long term. The seminars will be implemented in close cooperation of DZIF with the D-SOLVE Academy and involve leading European virologists, immunologists and hepatologists.

November 25<sup>th</sup> 2024 at 5 p.m. (Medical School Hannover, building J01 - lecture hall M, Carl-Neuberg-Str. 1, Hannover | [hybrid](#) ID: 375 730 822 417, Passcode: JuW7tz)

**“Clinical application of gene-modified HBV-specific T cells for treatment of HBV-induced HCC.”**

**Dr. Karin Wisskirchen - SCG Cell Therapy GmbH Germany / Planegg (Germany)**

December 16<sup>th</sup> 2024 at 5 p.m. (Medical School Hannover, building J01 - lecture hall N, Carl-Neuberg-Str. 1, Hannover | [hybrid](#) ID: 375 730 822 417, Passcode: JuW7tz)

**„Adapting to a life in the human liver: a T cell perspective.“**

**Dr. Laura Pallett - UCL Institute of Immunity and Transplantation / London (England)**

Monday, 25 November 2024, 5 p.m.
